Message from the President:

Your security is very important to us.

Over the next few months, SAFCU will be making changes to our website, online banking, and debit cards. Our website, www.safcu.com will have a new look. The same information will be available, however, we are making an effort to build a more user friendly, and mobile friendly website.

SAFCU is upgrading our online banking platform to Mobicint - a more unified mobile and desktop banking experience at your fingertips. You will notice a new design with Mobicint.

We will provide tutorial videos you can view at your convenience prior to signing in.

What's new with Mobicint? You can move money between financial institutions using a single platform.

You can set account alerts based on balances, transactions, and payment reminders.

You can access bill pay from your mobile device, as well as your desktop computer.

As of June 1st, SAFCU began issuing new debit cards with the EMV chip technology.

When your current debit card expires, you will receive the new card equipped with a small, metallic square computer chip. In the wake of numerous large-scale data breaches and increasing rates of counterfeit card fraud, we have migrated to this new technology. This is a safer way to pay and helps reduce the cost of fraud.

Our friendly staff is always willing to help answer any questions you may have.

Please do not hesitate to call us!

Thank you for being our member,

Laura Whisenhunt
